CONTRACT NUMBER: GS-35F-451GA

PERIOD COVERED BY CONTRACT:
May 22, 2017 through May 21, 2022

BUSINESS SIZE:
Small Business

Pricelist current through latest mass mod accepted.

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!®, a menu-driven database system. The INTERNET address GSA Advantage!® is: GSAAdvantage.gov. For more information on ordering from Federal Supply Schedules click on the FSS Schedules button at fss.gsa.gov.

Table of Contents

1a. **AUTHORIZED SPECIAL ITEM NUMBERS (SINs):**

<u>*SIN*</u>   <u>*DESCRIPTION*</u>

54151S   *Information Technology Professional Services*

1b. **Lowest Priced Model Number and Price for each SIN:** *See Price List*

1c. **SERVICES OFFERED:** *See Price List*

2. **MAXIMUM ORDER PER SIN:**

<u>*SIN*</u>   <u>*MAXIMUM ORDER*</u>

54151S   *$500,000 per SIN/Order*

3. **MINIMUM ORDER LIMITATION:** *$100*

4. **GEOGRAPHIC COVERAGE (DELIVERY AREA):** *Domestic delivery is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.*

5. **POINT OF PRODUCTION:** *United States*

6. **BASIC DISCOUNT:** *Prices listed are net, discounts have been deducted and the industrial funding fee has been added.*

7. **QUANTITY DISCOUNT:** *None*

8. **PROMPT PAYMENT TERMS:** *Net 30*

9a. **GOVERNMENT PURCHASE CARDS ARE ACCEPTED UP TO THE MICRO-PURCHASE THRESHOLD.**

9b. **GOVERNMENT PURCHASE CARDS ARE ACCEPTED ABOVE THE MICRO-PURCHASE THRESHOLD.**

10. **FOREIGN ITEMS:** *None*

11a. **TIME OF DELIVERY:** *As negotiated with the Ordering Activity*

11b. **EXPEDITED DELIVERY:** *Contact Contractor*

11c. **OVERNIGHT AND 2-DAY DELIVERY:** *Contact Contractor*

11d. **URGENT REQUIREMENTS:** *Contact Contractor*

12. **F.O.B. POINT:** *Destination*

TERMS AND CONDITIONS APPLICABLE TO INFORMATION TECHNOLOGY (IT) PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 54151S)

1.   SCOPE

a.   The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to IT Professional Services within the scope of this Information Technology Schedule.

b.   The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2.   PERFORMANCE INCENTIVES I-FSS-60 Performance Incentives (April 2000)

a.   Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.

b.   The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.

c.   Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3.   ORDER

a.   Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b.   All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4.   PERFORMANCE OF SERVICES

a.   The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

b.   The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

c.   The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.

d.   Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

    (1)   Cancel the stop-work order; or

    (2)   Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

b. If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

    (1)   The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

    (2)   The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

c. If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

d. If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

In accordance with FAR 52.212-4 CONTRACT TERMS AND CONDITIONS--COMMERCIAL ITEMS (MAR 2009) (DEVIATION I - FEB 2007) for Firm-Fixed Price orders and FAR 52.212-4 CONTRACT TERMS AND CONDITIONS COMMERCIAL ITEMS (MAR 2009) (ALTERNATE I OCT 2008) (DEVIATION I – FEB 2007) applies to Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. INDEPENDENT CONTRACTOR

All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions.

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

a. The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

b. The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—

     (1) The offeror;

     (2) Subcontractors; and/or

     (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING

Please refer to the labor category descriptions and pricing incorporated into this GSA Pricelist.

LABOR CATEGORY DESCRIPTIONS

Business Analyst I

Functional Responsibility: The Business Analyst I is responsible for analyzing internal and external customer needs. This includes identifying and determining equipment, software and process/procedural problems, needs and requirements. The Business Analyst I conducts interviews and facilitates group knowledge transfer sessions. The Business Analyst I gathers information and constructs sound, logical business improvement cases. The Business Analyst I maintains system parameters and requirement specifications. The Business Analyst I assists in the development of accurate documentation, thorough evaluation and complete traceability from inception through closure.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, business, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 7 years

Business Process Manager

Functional Responsibility: Acting as an IT Requirements SME, the Business Process Manager analyzes user interfaces, maintains hardware and software performance tuning, analyzes workload and computer usage, maintains interfaces with outside systems, analyzes downtimes, analyzes proposed system modifications, upgrades and new COTS. The Business Process Manager defines technology problems, and develops system requirements and program specifications, from which programmers prepare detailed flow charts, programs, and tests. Coordinates closely with programmers to ensure proper implementation of program and system technical specifications. Also, develops, in conjunction with functional users, system alternative solutions to ensure optimal performance of IT assets.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, business, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 13 years

Data Architect

Functional Responsibility: The Data Architect serves as the lead technical resource for strategic oversight and planning of database structural design and development. The Data Architect provides technical, strategic guidance to senior level database administrators and application developers in the creation and implementation of new databases, as well as the maintenance of major existing databases supporting evolving applications. Additionally, the Data Architect provides strategic guidance to data stewards on the development and implementation of data models to support organizational business processes. Duties include leading and consulting to all levels of the organization on the design, development and implementation of logical database structures and classification schema; and developing policies and procedures to build, maintain and leverage the data model; providing technical, strategic guidance on the development of metadata tags, Document Type Definitions (DTD), and schemas using appropriate technologies for representation such as HTML and XML; ensures that metadata and data standards and definitions will support both local business processes and system implementations thereof, and corporate requirements for sharing data.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 8 years

Programmer

Functional Responsibility: Programmers develop, create, and modify general computer applications software or specialized utility programs. Programmers analyze user needs and develops software solutions. Designs software or customizes software for client use with the aim of optimizing operational efficiency. Programmers may analyze and design databases within an application area, working individually or coordinating database development as part of a team. Programmers research, design, develop, and tests operating systems-level software, compilers, and network distribution software for industrial, military, communications, aerospace, business, scientific, and general computing applications. Sets operational specifications and formulate and analyze software requirements. May apply principles and techniques of computer science, engineering, and mathematical analysis. Programmers analyze and develops computer systems possessing a wide range of capabilities, including numerous engineering, business and records management functions. Develops plans for automated information systems from project inception to conclusion including systems requirements determination. Designs software tools and subsystems to support software reuse and domain analyses and manages their implementation. Manages software development and support using formal

specifications, data flow diagrams, other accepted design techniques and Computer Aided Software Engineering (CASE) tools.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, software engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 13 years

Project Integrator

Functional Responsibility: Project Integrators gather, analyze, and compose technical information acting as a Technical Writer/Editor. Project Integrators conduct research/interviews and ensures the use of proper technical terminology. Project Integrators translate technical information into clear, readable documents and presentation to be used by technical and non-technical personnel. Project Integrators supports the development of all types of documents and reports, including user manuals, project materials, installation guides, reports, etc. Also, develops and updates graphics presentations to improve the quality and enhance the usability of these documents. Responsible for integrating the graphics and information generated from meetings and facilitation sessions, using automated tools, and research methods into final IT deliverable documents.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 13 years

Software Engineer I

Functional Responsibility: The Software Engineer I designs computer applications software solutions to satisfy user needs. The Software Engineer I designs solutions to approved user and mission requirements; develops system specifications; conducts tradeoff analysis to determine best software solution – GOTS, COTS and/or custom products. The Software Engineer I develops and analyzes alternative solutions using a methodical tradeoff approach. The Software Engineer I designs custom software solutions and determines data and data storage requirements. The Software Engineer I researches and evaluates GOTS and COTS products to determine applicability to mission needs and system requirements. The Software Engineer I determines resource requirements for developing software solutions and maintaining production applications.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, software engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 7 years

Software Engineer II

Functional Responsibility: The Software Engineer II designs computer applications software solutions to satisfy user needs. The Software Engineer II designs solutions to approved user and mission requirements; develops system specifications; conducts tradeoff analysis to determine best software solution – GOTS, COTS and/or custom products. The Software Engineer II develops and analyzes alternative solutions using a methodical tradeoff approach. The Software Engineer II designs custom software solutions and determines data and data storage requirements. The Software Engineer II researches and evaluates GOTS and COTS products to determine applicability to mission needs and system requirements. The Software Engineer II determines resource requirements for developing software solutions and maintaining production applications.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, software engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 10 years

Software Engineer III

Functional Responsibility: The Software Engineer III designs computer applications software solutions to satisfy user needs. The Software Engineer III designs solutions to approved user and mission requirements; develops system specifications; conducts tradeoff analysis to determine best software solution – GOTS, COTS and/or custom products. The Software Engineer III develops and analyzes alternative solutions using a methodical tradeoff approach. The Software Engineer III designs custom software solutions and determines data and data storage requirements. The Software Engineer III researches and evaluates GOTS and COTS products to determine applicability to mission needs and system requirements. The Software Engineer III determines resource requirements for developing software solutions and maintaining production applications.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, software engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 15 years

Software Integrator

Functional Responsibility: The Software Integrator identifies component subsystems of the overall system and determines the requirements for ensuring that the subsystems work together to function as a single system. The Software Integrator plans, documents, and maintains solutions to total systems or subsystems that use internally created and/or commercial off-the-shelf products. The Software Integrator provides a total system perspective to include relationships, dependencies and requirements of hardware and software components. The Software Integrator performs network modeling, analysis, and planning. The Software Integrator researches COTS, GOTS solutions to solve integration problems and /or meet system requirements.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, software engineering, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 10 years

Systems Administrator

Functional Responsibility: The Systems Administrator provides planning, oversees infrastructure and application changes, ensures continuous operation, and manages system troubleshooting. The Systems Administrator assists in the development and documentation of systems administration standard operating procedures.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 7 years

Systems Architect I

Functional Responsibility: The Systems Architect I designs and develops solutions to complex applications problems, system administration issues, or network concerns. : The Systems Architect I performs systems management and integration functions. : The Systems Architect I analyzes science, engineering, business, and all other data processing problems for application to electronic data processing systems. : The Systems Architect I analyzes user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. The Systems Architect I develops future technology and architectural advancements to support architectural strategy, technology migration, and integration and evolution.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 8 years

Systems Architect II

Functional Responsibility: The Systems Architect II designs and develops solutions to complex applications problems, system administration issues, or network concerns. The Systems Architect II performs systems management and integration functions. The Systems Architect II analyzes science, engineering, business, and all other data processing problems for application to electronic data processing systems. The Systems Architect II analyzes user requirements, procedures, and problems to automate or improve existing systems and review computer

system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. The Systems Architect II develops future technology and architectural advancements to support architectural strategy, technology migration, and integration and evolution. The Systems Architect II applies knowledge of enterprise IT needs to design improved system and IT architecture processes, generate valid requirements, and ensures consistency with architecture. The Systems Architect II acts as an advisor and proposes changes based on analysis of requirements and new technology. Works with appropriate parties to resolve discrepancies between proposed IT systems and enterprise quality and security standards. The Systems Architect II provides technical and administrative direction for personnel performing software development tasks, makes recommendations, if needed, for approval of major systems installations. Designs and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 13 years

Systems Engineer I

Functional Responsibility: The Systems Engineer I serves to maintain a strong awareness of technical trends in information technology, develop and maintain a strong awareness of on-going IT projects, and business unit requirements; able to apply the project management model (e.g. Spiral, Waterfall, Agile) selected for a given development effort; and provide analysis, design, development, deployment, and lifecycle support for innovative hardware systems and applications. The Systems Engineer I's work involves being able to develop end-to-end cost analysis for projects; ensure systems being developed comply with the enterprise technical architecture; and keep senior management apprised of project or program status.

Minimum Education: Bachelor's Degree in computer science, information technology engineering, mathematics, or related technical field. 4 years of related experience may be substituted for a Bachelor's Degree.
Minimum Experience: 10 years
